	Vaje/Tutorial: slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
<ul style="list-style-type: none"> • Vpis v drugi ali tretji letnik študijskega programa. • Študent mora pred izpitom pripraviti in predstaviti seminarsko nalogu. 	<ul style="list-style-type: none"> • The prerequisite for inclusion is enrolment in the second or third year of study. • Students have to successfully prepare and present a seminar paper before the examination.

Vsebina:	Content (Syllabus outline):
<ul style="list-style-type: none"> • Definicija ekoterapije in izhodišča za njen vključevanje v integrativno medicino; • Ekološka, nevrokognitivna in psihološka ozadja ekoterapije; • Ekoterapevtske metode: <ul style="list-style-type: none"> – zdravilna hortikultura, – gozdne kopeli, – zelena vadba, – aromaterapija, – terapija z adaptogenimi rastlinami in gobami. 	<ul style="list-style-type: none"> • Definition of ecotherapy and the basis of its integration into integrative medicine; • Ecological, neurocognitive and psychological backgrounds of ecotherapy; • Methods in ecotherapy: <ul style="list-style-type: none"> – horticultural therapy, – forest bathing, – green exercise, – aromatherapy, – therapy using adaptogenic plants and mushrooms.

<ul style="list-style-type: none"> • <i>Ekoterapija za krepitev zdravja in povečanje kognitivnih sposobnosti;</i> • <i>Uporabnost ekoterapevtskih pristopov pri različnih bolezenskih stanjih:</i> <ul style="list-style-type: none"> – metabolni sindrom (povišan krvni tlak, debelost in slatkorna bolezen), – rehabilitacija po poškodbah in boleznih (npr. po srčnem infarktu in možganski kapi), – psihiatrična stanja (anksioznost, depresivna stanja, posttravmatska stresna motnja, sindromi odvisnosti, sindrom hiperaktivnosti pri otrocih), – demenca, – paliativna stanja in – pomanjkanje vitamina D s posledicami; • Primeri dobre prakse: uporaba ekoterapije po svetu (Južna Koreja, Japonska, Škotska, Finska), • Terenske vaje in praktične delavnice: prikaz različnih ekoterapevtskih metod v sodelovanju z aromaterapeutom in kineziologom. 	<ul style="list-style-type: none"> • <i>Ecotherapy for health promotion and enhancement of cognitive abilities;</i> • <i>Applicability of ecotherapeutic approaches in different diseases:</i> <ul style="list-style-type: none"> – metabolic syndrome (high blood pressure, obesity and diabetes), – rehabilitation after injuries and illnesses (e.g., after heart attack and stroke), – psychiatric conditions (anxiety, depression, post-traumatic stress disorder, addiction syndromes, hyperactivity syndrome in children), – dementia, – palliative conditions and – lack of vitamin D and its consequences; • Examples of good practice: the use of ecotherapy worldwide (South Korea, Japan, Scotland, Finland). • <i>Field excursions with practical workshops:</i> presentation of various ecotherapeutic methods in cooperation with an aromatherapist and a kinesiologist.

- Kreft, S., in Kočevar Glavač, N., (ur.). (2013). *Sodobna fitoterapija: z dokazi podprtja uporaba zdravilnih rastlin*; 2., 3. in 13. poglavje – adaptogeni. Ljubljana: Slovensko farmacevtsko društvo.

Priporočljiva literatura/Recommended literature

- Williams, F. (2017). *The nature fix. Why nature makes us happier, healthier and more creative*. New York: WW Norton & Co. (slovenski prevod, 2018).
- Bone, K., in Mills, S., (eds.). (2013). *Principles and practice of phytotherapy: modern herbal medicine*, 2nd edition; izbrani odseki 8. in 9. poglavja ter rastlinske monografije. London: Churchill Livingstone Elsevier.
- Izbrani članki iz zbornikov znanstvenih srečanj, izbrani članki iz domačih in tujih znanstvenih revij s področja ekoterapije, izbrane internetne strani (npr. Plants for a Future – PFAF, Wikipedia itd.).

Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

<ul style="list-style-type: none"> • poznavanje in razumevanje posebnosti ekoterapije v primerjavi z ostalimi terapevtskimi pristopi; • poznavanje in razumevanje umestitve ekoterapije v področje zdravstva in področje zdravilstva; • kritično razumevanje utemeljenosti ekoterapije kot nove vede na 1) znanstvenih dognanjih in 2) na praktičnih izkušnjah; • koherentno obvladovanje temeljnega znanja, sposobnost povezovanja znanja z različnih področij in aplikacij; • sposobnost analize, sinteze in predvidevanja rešitev ter posledic; • pridobitev sistematičnega znanja o različnih osnovnih ekoterapevtskih pristopih in njihovi uporabnosti pri zdravljenju, lajšanju in preprečevanju različnih bolezni in zdravstvenih težav; • slušatelji spoznajo adaptogene rastline in gobe ter njihovo uporabnost v sklopu ekoterapije; • sposobnost uporabe znanja v praksi; • avtonomnost v strokovnem delu; • etična refleksija in zavezanost profesionalni etiki. 	<ul style="list-style-type: none"> • knowledge and understanding of the specific features of ecotherapy in comparison with other therapeutic approaches; • knowledge and understanding of categorisation of ecotherapy into the field of health care and complementary medicine; • a critical understanding of ecotherapy (as the new science) validation by 1) scientific findings and 2) practical experience; • coherent mastering of the basic knowledge and the ability to link the knowledge from various areas and its applications; • the ability of analysis, synthesis and prediction of solutions and consequences; • acquisition of systematic knowledge on the various basic ecotherapeutic approaches and their applicability in treatment, alleviation and prevention of various diseases and health problems; • participants acquire knowledge about adaptogenic plants and mushrooms and their use within ecotherapy; • the ability to implement knowledge into practice; • autonomy in professional work; • ethical reflexion and dedication to professional ethics.
--	--

Predvideni študijski rezultati:	Intended learning outcomes:
<p>Študent/študentka:</p> <ul style="list-style-type: none"> • Razume ekološka, nevrokognitivna in psihološka ozadja ekoterapije kot novega terapevtskega pristopa v medicini. • Pozna osnovne metode ekoterapije ter njihovo uporabnost tako v primarni preventivi za krepitev zdravja kot tudi za zdravljenje različnih telesnih in duševnih bolezni. • Pozna adaptogene rastline in gobe ter jih zna uporabiti v sklopu ekoterapije. • Razume posebnosti ekoterapije v primerjavi z drugimi terapevtskimi pristopi. • Razvije sposobnost povezovanja znanja ekoterapije z znanjem drugih področij. 	<p>Students:</p> <ul style="list-style-type: none"> • Understand the ecological, neurocognitive and psychological backgrounds of ecotherapy as a new therapeutical approach in medicine. • Know the basic methods of ecotherapy and their applicability both in primary prevention for health promotion as well as in the treatment of various physical and mental diseases. • Know the adaptogenic plants and mushrooms and is trained to use them within ecotherapy. • Understand the specificity of ecotherapy compared to other therapeutic approaches.

<ul style="list-style-type: none"> Se usposobi za uporabo ekoterapevtskega znanja v praksi. Razvije sposobnost kritične presoje uporabe ekoterapije glede na zdravstvene težave bolnika. 	<ul style="list-style-type: none"> Develop the ability to integrate knowledge about ecotherapy with other areas of knowledge. Are trained in the use of ecotherapeutic knowledge in practice. Develop the ability to critically assess the use of phytotherapy in relation to the patient's health problems.
--	---

Metode poučevanja in učenja:	Learning and teaching methods:
<ul style="list-style-type: none"> Predavanja z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov). Seminarske vaje: priprava, predstavitev in uspešen zagovor projektne/raziskovalne naloge, portfolio (reševanje problemov, študije primera, kritično presojanje, diskusija, refleksija izkušenj, vrednotenje, projektno delo, timsko delo). Terenske vaje in praktične delavnice: prikaz različnih ekoterapevtskih metod. 	<ul style="list-style-type: none"> Lectures with active student participation (explanation, discussion, questions, examples, problem solving). Seminar tutorial: preparation, presentation and a successful defence of a project paper, portfolio (problem solving, case studies, methods of critical thinking, discussion, reflection of experience, evaluation, project work, teamwork). Field excursions with practical workshops: presentation of various ecotherapeutic methods.

Načini ocenjevanja:	Delež (v %) Weight (in %)	Assessment:
Načini: <ul style="list-style-type: none"> izpit izdelava, predstavitev in zagovor seminarske naloge 	60 % 40 %	Types: <ul style="list-style-type: none"> exam preparation, presentation and defence of the seminar paper
Ocenjevalna lestvica: ECTS.		Grading scheme: ECTS.
