Temeljna literatura in viri/Readings:

Temeljna literatura/Basic literature

- Adamič, Š. (1995). *Temelji biostatistike*. Ljubljana: Medicinska fakulteta-Inštitut za biomedicinsko informatiko.
- Bowling, A. (2009). *Research methods in health: investigating health and health services*. 3rd ed. Maidenhead, Berkshire, New York: McGraw-Hill, Open University Press.
- Ferligoj, A. (1994). *Osnove statistike na prosojnicah*. Ljubljana: Samozal. Z. Batagelj.
- Frankfort-Nachmias, C. in Nachmias, D. (2000). *Research Methods in the Social Sciences*. New York: Worth Publishers.

Priporočljiva literatura/Recommended literature

- Tratnik, M. (2002). *Osnove raziskovanja v managementu*. Koper: Visoka šola za management.

Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

- celostno obvladovanje temeljnega znanja s področja metodologije raziskovanja ter njegova interdisciplinarna uporaba,
- obvladovanje raziskovalnih metod in postopkov,
- usposobljenost za prepoznavanje potreb po spremembah in uvajanje le-teh,
- usposobljenost za sodelovanje, delo v skupini, timsko delo,
- usposobljenost za aplikacijo pridobljenega temeljnega znanja, kvantitativnih metod in raziskovalnih dognanj v obliki raziskovalne naloge,
- sposobnost za reševanje konkretnih delovnih problemov z uporabo znanstvenih metod in postopkov,

Objectives and competences:

The learning unit contributes mainly to the development of the following general and specific competences:

- comprehensive managing of fundamental knowledge in the field of research methodology and its interdisciplinary application,
- managing research methods and procedures,
- the ability to recognise the need for change and to implement it,
- the ability to cooperate, work in groups and teams,
- the ability to apply the acquired fundamental knowledge, quantitative methods, and research findings in the form of research papers,
- the ability to solve concrete work problems using scientific methods and procedures,

| <ul style="list-style-type: none"> • razumevanje in uporaba metod kritične analize in razvoja teorij ter njihova uporaba pri reševanju problemov s področja zdravstva, • uporaba informacijske in komunikacijske tehnologije ter sistemov kot vira informacij, komunikacijskega sredstva, kot orodja pri raziskovalnem delu in kot delovnega sredstva, • obvladovanje izbranih raziskovalnih orodij za reševanje problemov v fizioterapiji. | <ul style="list-style-type: none"> • the understanding and application of the methods of critical analysis and theory development and their application in solving health care problems, • the use of information and communication technologies and systems as a source of information, as a means of communication, as a research work tool and as a working resources, • managing selected research tools for solving problems in physiotherapy. |
|--|--|

Predvideni študijski rezultati:

Študent/študentka:

- spozna in utrdi znanje o oblikovanju konceptov in metodološkem okviru raziskovanja,
- spozna in utrdi temeljne raziskovalne pristope,
- se nauči uporabljati koncepte in izbrane metode pri znanstvenem opazovanju izbranih pojavov,
- pridobi znanje in sposobnosti za kritični izbor interpretativnega aparata v povezavi z izbranim konceptom in metodologijo,
- se nauči uporabljati pridobljeno znanje za pripravo in izvedbo aplikativne raziskovalne naloge, projektne naloge in magistrske naloge v nadaljevanju študija ter izvedbo raziskovalnih projektov pri svojem strokovnem delu s področja zdravstva.

Intended learning outcomes:

Students:

- gain solid knowledge about the formation of concepts in the methodological framework of research,
- get acquainted with the solidly fundamental research approaches,
- learn to apply the concepts of selected methods in scientific observation of selected phenomena,
- acquire knowledge and the ability to critically select the interpretive apparatus in connection with the chosen concept in the methodology,
- use the acquired knowledge for preparation in the implementation of applied research assignments, project assignments in the master's thesis in the continuation of studies in the implementation of research projects in their professional work with health professionals.

Metode poučevanja in učenja:

- *predavanja* z aktivno udeležbo študentov (razлага, diskusija, vprašanja, primeri, reševanje problemov),
- *seminarske vaje*: predstavitev in uspešen zagovor projektne/raziskovalne naloge (reševanje problemov, študije primera, kritično presojanje, diskusija, refleksija izkušenj, vrednotenje, projektno delo, timsko delo).

Learning and teaching methods:

- *lectures* with active student participation (explanation, discussion, questions, examples, problem solving),
- *seminar tutorial*: presentation and successful defence of a project/research paper (problem solving, case studies, methods of critical thinking, discussion, reflection on experience, evaluation, project work, teamwork).
