Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

- obvladovanje temeljnega znanja, sposobnost povezovanja znanja z različnih področij, na katerih temelji zdravstvena nega,
- usposobljenost za prevzemanje odgovornosti v profesionalnem delu,
- sposobnost prepoznati in interpretirati znake normalnega in spreminjačega se zdravja (postavljanje negovalnih diagnoz),
- sposobnost upoštevati individualne potrebe pacienta skozi življenjska obdobja, v zdravju in bolezni,

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

- mastering basic knowledge, the ability of integration of knowledge from different fields, on which the nursing care is based,
- being qualified for taking responsibility in professional work,
- the ability to recognize and interpret the signs of normal and changing health conditions (setting the nursing diagnoses),

<ul style="list-style-type: none"> • usposobljenost za učinkovito komuniciranje (vključujoč uporabo tehnologij) s pacienti, z družinami in socialnimi skupinami v normalnem in specifičnem komunikacijskem okolju/vzdušju, • usposobljenost za prepoznavanje psihičnih stanj, kot so strah, stres in depresija, dajanje emocionalne podpore ter svetovanje, • spoznanje, da je dobro počutje pacienta doseženo le s prizadevanjem vseh članov zdravstvenega tima. 	<ul style="list-style-type: none"> • the ability to consider the individual needs of the patient through the periods of life in health and disease, • the ability for an effective communication (including the use of ICT) with patients, families and social groups in the normal and specific communication environment/atmosphere, • being qualified to recognize the mental states as fear, stress and depression, giving the emotional support and advice, • realising that a well-being of a patient can be achieved through the combination of effort and activity of all members of the healthcare team.
