Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

- celovito kritično razmišljanje, sposobnost analize, sinteze in predvidevanja rešitev s področij zdravstvenih ved, zdravstvene nege in medicine; družboslovnih in humanističnih ved, naravoslovno-matematičnih ter drugih ved (interdisciplinarnost),
- obvladovanje raziskovalnih metod, postopkov, procesov in tehnologije,
- sposobnost kreativne uporabe znanja pri delu v kliničnem okolju,
- sposobnost reševanja kompleksnih problemov v kliničnem okolju z multidisciplinarnim pristopom: analiza situacije, načrtovanje ukrepov, izvedba načrta, vrednotenje in samovrednotenje,
- profesionalna komunikacija s strokovnjaki drugih znanstvenih področij in usposobljenost za delovanje v medpoklicnih timih,
- vsestransko in sistematično obravnavo pacienta glede na relevantne fizične, psihične, socialne, kulturne, duhovne in družbene dejavnike,
- varovanje patientovega dostenjstva, zasebnosti in zaupnosti podatkov,
- uvajanje in izvajanje sodobnih metod dela v zdravstveni negi in sistemu zdravstvenega varstva.

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

- comprehensive critical thinking, the ability to analyse, synthesise and predict solutions in the field of nursing care, humanities, educational, social, organisational, natural mathematical and other sciences (interdisciplinarity),
- mastering research methods, procedures, processes and technology,
- the ability to creatively use knowledge in the clinical environment,
- the ability to solve complex issues in the clinical environment using the multidisciplinary approach: analysis of the situation, planning the measures, implementing the plan, evaluating and self-evaluating,
- professional communication with experts from other scientific fields and qualification to work in interprofessional teams,
- comprehensive and systematic treatment of the patient with regard to relevant physical, psychological, social, cultural, spiritual and social factors,
- protection of patients' dignity, privacy and data confidentiality,
- introduction and implementation of contemporary work methods in nursing care and the healthcare system.
